Title:	<b>Assistant Professor of Marine Sedimentology</b>
Affiliation:	Department of Marine Sciences, University Hill, Lesvos
Phone:	(+30) 22510 36829
E-mail	hasiotis@marine.aegean.gr

Thomas Hasiotis is an Assistant Professor of Marine Sedimentology at the Department of Marine Sciences, University of Aegean.

He has more than 15-year research/teaching experience. He has participated as Principal Investigator and Senior Researcher in numerous National and European Research Programmes and has published scientific project on mapping and studying coastal and marine geological processes (more than 90 papers in International Journals, Scientific Publications and Proceedings International / Greek Conferences). His research focuses on recent sedimentation processes, seismic stratigraphy, marine geo-hazard and man-made hazards and their consequences in the coastal and offshore marine environments, and socio-economic impacts of human-nature interactions in the coastal zone sea level changes during the Quaternary. He has been for many years a scientific consultant for marine survey engineering companies (e.g. Akti Engineering and GEOLAB S.r.l. (Italy)).
